

Fitting & Care Instructions

Zynex Pro TLSO

Instructions for putting on brace:

Step 1: Open brace and lay flat on a table. Detach side wings from right and left to match the patients waist circumference and size.

Step 2: Loosen shoulder straps and slide on to patient like a book bag.

Step 3: Wrap side wings around waist and Velcro closed around the patients abdomen

Step 4: Tighten shoulder straps by pulling down on straps.

Step 5: Tighten waist belt by pulling on lower pull tabs to desired support.

Step 6: Locate chest support buckle and adjust height by detaching from and then reattaching to shoulder straps. Once correct height is found tighten by pulling on straps on either side

Step 7: Find upper pull tabs connected to shoulder straps. Pull to desired extension

Step 8: (Optional) The thoracic pull tabs and lumbar pull tabs can be attached to each other to use as a single pull tab

Care Instructions: Hand wash with a light detergent and let air dry.

6 month warranty from any defects

Step 9: Instruct the patient in the application and removal of the device and observe them apply and remove the brace at least one time.
